

# Information Technology

**Information technology** is a computer;  
something that has a computer; or something  
that is made to work with a computer.

## IT in school can...

Help do a job (so you can learn or your teacher can teach)

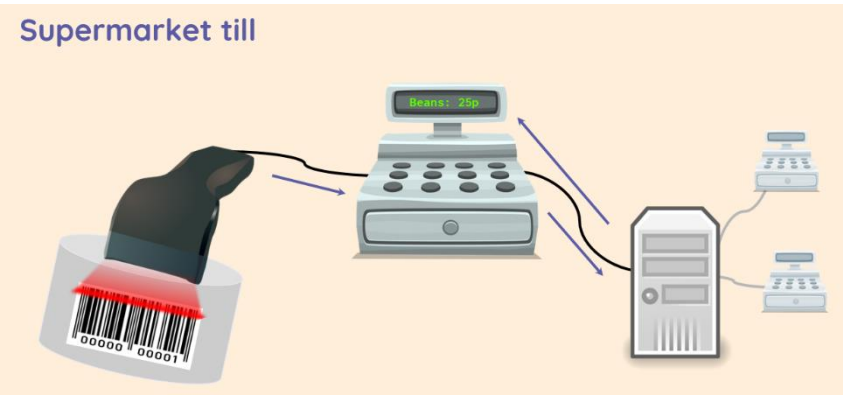

Help to communicate (talk)

Let you play

Following rules when using IT will help to keep you safe and help you to respect others.

IT can be found beyond school, in public places such as cafés, shops, libraries, offices...  
 Some IT can be found inside buildings and others can be found outside.  
 Some examples of IT might be found both inside and outside, like CCTV cameras and bank cards.

**Using IT can:**

- Save humans time
- Make it easier to do jobs
- Help people to do difficult jobs more quickly and accurately
- Hold lots of information, which humans might forget
- Do jobs without the need for humans (pedestrian crossing)
